Preventative/Maintenance chiropractic care is **not covered by insurance** but is by definition elective healthcare that promotes health, enhances the quality of life, and aids with the prevention of symptomatic deterioration. It may also be initiated with patients who exhibit no symptoms in order to promote health and to prevent future problems. This care may incorporate screening/evaluation procedures designed to identify developing risks or problems that may pertain to the patient's health status and give care/advice for these. Preventive/maintenance care is provided to optimize a patient's health.

The fee schedule highlighted in blue is based upon an average of the reimbursement rates from the three insurance companies we are credentialed with [Highmark BC/BS, UPMC, & UHC] for the services we offer. For those patients who wish to utilize their health insurance and possess a policy that contains a high deductible or out-of-pocket costs for care prior to the policy covering a portion of the cost this is the fee schedule we are required to adhere to which is mandated by Federal & State insurance law.

### **OUR PLEDGE TO YOU**

**We will provide you** with evidence-based & integrative chiropractic care that is conventional as well as cost-effective and **we will not utilize lengthy treatment plans** and/or unwarranted therapies.
